OUR EXPERTISE MAKES YOUR WORK EASIER

Datasensing is merging Datalogic's Sensor & Safety and Machine Vision business unit with M.D. Micro Detectors, both with 50 years of experience and representing the history of sensors in Italy since the early '70s.

Our company is developing, manufacturing and supplying Machine Vision, Sensor and Safety, with more than 200 product lines, including 22500 standard and custom part numbers, protected by over 100 patents.

Our products are designed to inspect, detect and protect your production in better and easier way, with diffused applications in industrial automation of manufacturing and intralogistics processes.

Datasensing means high technology and innovative products... but it's the experience of our extraordinary people that makes the difference, from pre-sales to order processing and post-sales.

We have a global presence, with Headquarters in Italy and offices in Europe, China and US, together with a qualified network of distribution partners in all countries.

Datasensing not only focus on products, but also on Environmental, Social and Governance initiatives, as reducing the impact of products, production and logistics.

Our Mission is to create added value through smart sensing solutions based on sustainable standard and custom products, developed with care and leading know how.

Our Vision is to be the top of mind partner to innovate sensing solutions for industrial automation.

WEBSITE

KNOWING HOW FROM 50+ YEARS

DATALOGIC is founded by Romano Volta in Bologna, Italy, and DIELL in nearby Modena on the initiative of Paolo Iori, to meet the new sensor needs of the manufacturing and packaging industries

DATALOGIC develops the optical barcode reading technology and the first industrial laser scanner application in Europe, becoming in a short time the reference technology leader

The new strategy "Il Punto di Volta" leads DATALOGIC to be "an industrial reality with constant and lasting growth, important at an international level" and to enter the portable terminal market

1970

1980

1985

1990

DATLOGIC DL®
OPTIC ELECTRONICS

DIELL

DATALOGIC expands with new offices in Germany (1974), Japan (1976), US (1978).

DIELL specializes in photoelectric sensors, introducing the first cylindrical M18 (1977) one of the most popular type in the world

DATALOGIC introduces the first barcode reader in an airport, Milan - Linate (1984) and continues its growth at a global level. DIELL changes its name to M.D. Micro Detectors introducing inductive sensors

Datalogic Group is a global leader in the automatic data capture and factory automation markets. It is well known around the world for designing and producing barcode readers, mobile computers, sensors for detection, measurement and safety, RFID, machine vision and laser marking systems. Datalogic solutions help customers increase the quality of their processes in the Retail, Manufacturing, Transportation & Logistics, and Healthcare industries.

The Group has a rich history of over 50 years, during which enormous successes have been achieved: 8 R&D centers and 3 DL Labs in Italy, USA, Vietnam, and China; 11 manufacturing and repair facilities in the USA, Hungary, Slovakia, Italy, China, Vietnam, and Australia; a portfolio of around 1,200 patents and patent applications in multiple jurisdictions; thousands of prestigious partners and customers spread across five continents.

Datalogic Group has offices in 29 countries worldwide, with headquarters in Bologna, Italy. It is through the close cooperation of more than 3,000 employees that Datalogic can boast some of the most remarkable automatic data capture and factory automation solutions available in the market today.

To further strengthen its market position in Industrial Automation, in 2021 Datalogic acquired M.D. Micro Detectors, an Italian company specializing in optical, inductive, capacitive and ultrasonic sensors. This, merged with Datalogic's Sensors & Safety and Machine Vision Business Unit in early 2022, creating a new company and brand Datasensing.

Datasensing's Machine Vision, Sensors and Safety portfolio solves the most challenging applications in Factory Automation, specializing in Processing and Packaging machinery, and Automated Material Handling Systems related to Manufacturing Industries such as Automotive, Electronics, Food & Beverage, Pharmaceutical, Home & Personal Care, Paper and Printing, Metal- and Woodworking, Ceramics, Glass, Textiles etc.

With advanced Inspection, Detection, and Protection devices, the Datasensing Mission is to create added value through smart sensing solutions based on sustainable standard and custom products. They are developed with care and leading know how, with the Vision to be the premier partner for innovative sensing solutions for industrial automation.

DATALOGIC is a world leader in automatic data acquisition, in 2001 is listed on the New Market of the Milan Stock Exchange and focuses on the sensor market through the new company DATASENSOR

M.D. develops ultrasonic sensors and starts manufacturing in China. DATALOGIC makes new acquisitions (Evolution Robotics, PPT Vision, Accu-Sort) and DATASENSOR becomes the Sensor & Safety business unit

DATALOGIC acquires M.D. Micro Detectors (2021) and Pekat Vision (2022), creating the new Company DATASENSING to strengthen its presence in sensors, safety and machine vision markets

1995

2000

2005

2010

2015

2020

M.D. Micro Detectors starts the Spanish branch, Diell Ibérica SA, also introducing capacitive sensors and area light arrays. Datalogic starts a new production plant in Castiglion Messer Raimondo, Teramo, Italy

DATASENSOR wins the "International Best Factory Award" 2005 and introduces many new application sensors, a complete safety light curtains range, and an innovative smart camera sensor

DATALOGIC increases its presence in Manufacturing, T&L, Retail, Healthcare. Valentina Volta is Datalogic Group's C.E.O. and the founder Romano Volta President. The first Safety Laser Scanner is launched

TRACEABILITY

Product traceability is becoming more and more important in every industry, where the identification of items along every manufacturing and intra-logistic process is required, from raw material receiving to finished good shipment whilst passing through work-in-progress management and monitoring. Datalogic provides a wide portfolio of products and solutions to solve all traceability needs.

INSPECTION

Machine vision is an indispensable tool for controlling the quality of processes and products in factory automation and intra-logistics. For this purpose Datasensing offers smart cameras, industrial cameras, vision processors and software tools suitable to read codes or characters (OCR), recognize patterns, detect defects, locate parts, guide robot arms, and control assembly and manufacturing lines.

DETECTION

PROTECTION

Photoelectric, inductive, capacitive and ultrasonic sensors are essential in industrial automation to detect the presence of objects or parts, inspect their integrity or correct assembly and measure dimensions, distance, or positioning. Datasensing sensors are available in many different lines, models and functionalities, sensing the smallest or fastest moving objects, even with transparent or shiny surfaces.

Safety devices are mandatory for operator protection in potentially hazardous areas, plants or machinery. Datasensing safety light curtains are used for the detection of finger, hand, arm, body, or presence detection in fixed applications; whereas safety laser scanners are recommended for area protection in static or dynamic applications, such as robotic cells and automated guided vehicles (AGV).

DATASENSING
easing automation challenges

SAFETY

Safety devices are mandatory for operator's protection in potentially hazardous areas, plants or machinery. Safety optoelectronic devices are safety light barriers, curtains, grids, light beams and control units, used for the detection of finger, hand, arm, body, or presence detection in fixed applications. Safety laser scanners are suitable for configurable area protection or even dynamic applications, in particular robotic cells and automated guided vehicles (AGV). Safety accessories include cables, connection box, brackets, IP69K protection tubes, lens shield, laser pointer, test pieces.

Manufacturing industry applications include automotive and electronics plants, especially robotic cells; food & beverage, pharmaceutical, chemical goods processing and packaging machines; any machinery used in woodworking, metalworking, textile, ceramic, glass, stones, paper, etc. Logistics applications are diffused in automated material handling, conveyors, storage and retrieval, automated warehouses, and AGV. Furthermore, logistics applications are integrated by Lidars for guidance and navigation, and encoders for the vehicle speed measurement.

SAFETY LIGHT CURTAINS OR SAFETY LASER SCANNER?

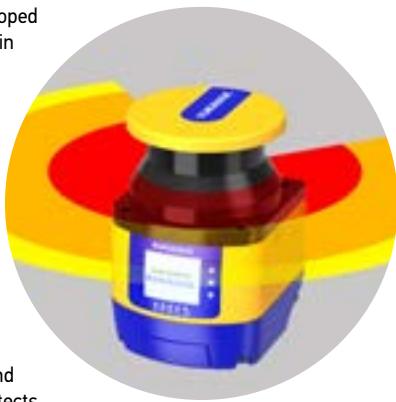

In the safety laser scanners market, Datasensing qualifies as one of the few companies to offer its own developed and manufactured devices. Datasensing is also one of the world's main safety light curtains manufacturers. So, who better to answer the question?

SAFETY LASER SCANNER: HOW IT WORKS?

Safety laser scanners are developed for the worker protection in potentially hazardous areas and machinery.

According to EN 61496-1 and EN 61496-3, safety laser scanners are considered Electro-Sensitive Protecting Equipment (ESPE) and Active Optoelectronic Protective Device Responsive to Diffuse Reflection (AOPDDR), defined as "Device with a sensor function produced by optoelectronic send and receive elements which detects the diffuse reflection of optical radiation generated in the device due to the presence of an object in a defined two-dimensional protective field."

Simply put, a safety laser scanner is a device that emits a laser beam that rotates over an angle of typ. 190° up to 275°, detecting the presence and distance of any objects or operators, based on the time of flight of the reflected light. Datasensing enhanced safety laser scanners are inside SLS product line.

WHERE ARE SAFETY LASER SCANNERS USED?

Safety laser scanner applications can be STATIC by detecting the operator's access or presence in an area, for example a robotic cell, or DYNAMIC by mounting the laser scanner on automated guided vehicle (AGV) and detecting obstacles or operators on its way.

Safety laser scanners can also be used in applications with horizontal mounting (optical axis <=30°), or vertical mounting (optical axis >30°).

With horizontal mounting, the detection usually occurs on a plane close to and parallel to the floor, with typical applications in hazardous areas that can be approached by a person, such as open robotic cells or machinery for processing metal, wood, or other materials.

In vertical mounting, the detection occurs in a plane perpendicular to the floor, effectively creating a barrier in which access protection can be configured, such as in conveyor or palletizing areas.

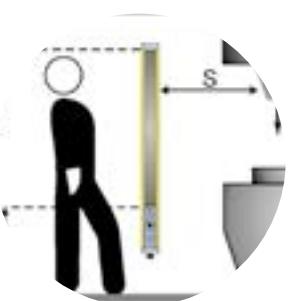

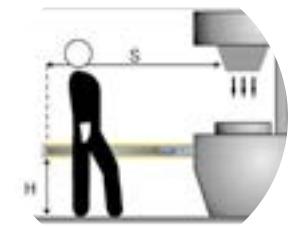

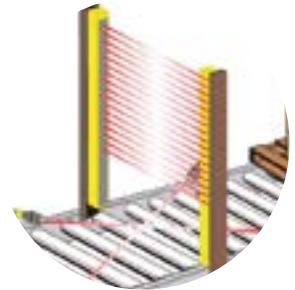

SAFETY LIGHT CURTAIN: HOW IT WORKS?

Safety light curtains are also used for the protection of worker in potentially hazardous areas and machinery. According to EN 61496-1 and EN 61496-2, safety light curtains are considered Electro-Sensitive Protecting Equipment (ESPE) and Active Opto-electronic Protective Device (AOPD) defined as "Device with a sensor function produced by optoelectronic send and receive elements which detect a break in the optical radiation generated in the device due to the presence of an opaque object in the defined protective field."

Basically, it can be detected when an object, operator, or parts thereof (e.g., finger, hand, or arm) interrupts one or more light beams.

Datasensing latest safety light curtains are inside SH4 product line.

WHERE ARE SAFETY LIGHT CURTAINS USED?

Safety light curtain applications can only be STATIC for hazard point protection. For example, close to metalworking machines, or access protection to dangerous areas, such as conveyors, palletizers, and automated warehouses.

Again, safety light curtains can be installed with horizontal or vertical mounting.

With horizontal mounting, the detection usually occurs on a plane parallel to the floor. Typical applications include detection of an operator presence in a protected area before starting a hazardous process or machinery.

In vertical mounting, the detection occurs in a plane perpendicular to the floor, effectively creating a barrier and an access control to dangerous areas or machinery parts.

SAFETY LASER SCANNER OR SAFETY LIGHT CURTAIN, HOW TO CHOOSE?

The selection of a safety sensor for use in machinery is part of the overall risk reduction process.

Such process starts with the analysis and evaluation of all possible risks the machine presents and ends with the validation and testing of the safety system.

The safety sensor chosen should fulfill any safety requirements specific to the machine. If there are no machine-specific requirements, the safety system should be designed to comply with all general safety and health standards, such as: EN ISO 12100: 2010 Safety of machinery – General principles for design – Risk assessment and risk reduction; EN ISO 13849-1: 2008 Safety of machinery - Safety-related parts of control systems. Part 1: General principles for design; EN ISO 13849-2: 2012 Safety of machinery - Safety-related parts of control systems. Part 2: Validation.

The overall system design dictates the parameters the safety sensors must meet.

The following list of parameters and functions related to safety sensors can serve as a checklist to help in the selection process.

1. Performance level (PL) and required performance level (PLr)

Performance level is one of five discrete levels (a, b, c, d, e) that specify the ability of the safety-related part of a control system to perform a specific safety function.

The performance level depends on system design, reliability of components used, diagnostic coverage of dangerous faults and ability of the safety parts to avoid common cause and systematic faults.

The minimum required Performance Level (PLr) to reduce a risk is based on three factors:

- i. the severity of injury;
- ii. the frequency of exposure to hazard;
- iii. the possibility to avoid the hazard.

Safety laser scanners have typically a PL d, whereas safety light curtains can reach PL c in Type 2 and PL e in Type 4.

Datasensing basic safety light curtains are inside SG2 product line for type 4 and SG4 for type 4.

2. Safety integrity level (SIL)

Safety integrity level expresses the degree of reliability reached by a safety device.

The higher the SIL integrity level of a safety system or function, the lower the probability that the safety system or function will fail.

In practice, also considering the Probability of a dangerous Failure per Hour (PFHd), a low performance level PL c corresponds to a SIL 1, a PL d to a SIL 2, and a PL e reaches a higher level SIL 3.

3. Type

Safety laser scanners are Type 3, whereas safety light curtains are classified as Type 2 or Type 4, depending on their design and optical performance.

The maximum PL that can be reached with a Type 2 is PL c, while for a Type 4 the maximum is PL e.

Therefore, to reduce the highest risks on machines, Type 4 should be used.

4. Detection Capability or Resolution

The detection capability is the diameter of the smaller object that will activate the device when it's placed in any point of the detection zone.

The value of the detection capability, together with response time, is crucial to calculating the minimum safety distance required between the light curtain and the dangerous zone.

SAFETY LASER SCANNERS OTHER SELECTION CRITERIA

More technical specifications to consider are:

- Working distance, with different safety and warning values;
- Number of programmable zones and areas;
- Aperture angle over which the detection is made;

- Minimum value of response time;

- Other functions like speed measurement, shut-off, master/slave, programming and monitoring over Ethernet, FieldBus interfaces, etc.

SAFETY LIGHT CURTAINS OTHER SELECTION CRITERIA

Other specifications to consider are:

- Resolution (eg. finger 14 mm, hand 30 mm, or body with 2, 3, or 4 beams);
- Controlled height, which can range from 150 mm up to 3 m or more;
- Operating distance between the emitting and receiving units;
- Housing sizes, material, and mechanical features such as IP protection or no dead zone.

SAFETY ADVANCED FUNCTIONALITIES

Other selection criteria can be the presence of advanced functionalities, e.g., Auto/Manual restart, EDM, Muting, Override, Blanking, Cascading, Anti-interference, etc.

RESTART INTERLOCK

This function prevents automatic restarting of a machine in three cases:

- after actuation of the sensing device during a hazardous part of the machine operating cycle
 - after a change in mode of operation of the machine
 - after a change in the means of start control of the machine

The start interlock instead prevents an automatic machine start when the electrical supply is switched on, or it is interrupted and restored. Both these functions are achieved by setting the Manual Restart.

EXTERNAL DEVICE MONITORING (EDM)

This function monitors the state of control devices which are external to the safety device.

The safety device shall go to a lock-out condition when an incorrect state is detected in one of the devices being monitored by the EDM.

MUTING AND OVERRIDE

The safety device can be forced in a temporary automatic suspension of a safety function(s), for example to allow the passage of materials, while detecting instead an operator thanks to specific muting sensors.

Muting function has safety requirements:

- it's independent from the operator intervention
- the muting starts after a sequence of at least two signals
- according to the risk assessment, a muting indicator can be needed
- it's temporary: when a time limit is reached, it must stop
- the muting sensors must be placed so that they detect actual presence of the load
- specific machine regulations (type C standard) must always be followed

BLANKING

This function allows masking of one or more areas, each of a defined size, either locally fixed (Fixed Blanking) or movable (Floating Blanking) in the detection zone. In this way objects or machine parts can be masked and not considered in the protected area.

CASCADING

This feature allows to connect two or more light curtains to each other, building a system that works as a single device, also allowing the protected height to be increased or different geometries to be constructed, either square or at other angles.

ANTI-INTERFERENCE

This is necessary when two or more devices are mounted close together, or even side by side, to prevent security detection from being disturbed.

WHAT PRODUCTS DOES DATASENSING RECOMMEND?

Datasensing offers SLS Safety Laser Scanners, distinguished by the completeness of range and ease of use, while among Safety Light Curtains the choice ranges from the best-selling SG4 series to the brand new SH4 with improved environmental features and extended functionality, or from the super-compact SLIM series to the world's unique IP69K stainless steel and hygienic design SG4-H for pharmaceutical aseptic environments.

SAFETY LIGHT CURTAINS

FIND YOUR SAFETY LIGHT CURTAIN

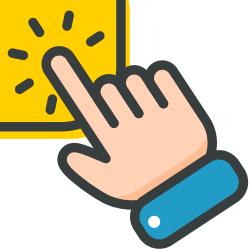

The selection of safety sensors for use in machinery is part of the overall risk reduction process, which starts with the analysis and evaluation of all possible risks the machine presents and ends with the validation and testing of the safety system. The sensors chosen should fulfill any safety requirements specific to the machine they will be mounted on. If there are no machine-specific requirements, the safety system should be designed to comply with all general safety and health standards. The overall system design dictates the parameters the safety sensors must meet. The following list of parameters and functions related to safety sensors can serve as a checklist to help in the selection process.

SH4 SERIES

**INTERACTIVE INDEX:
Just click the series' name!**

SH4 is a complete series of safety light curtains and grids, fit for almost all applications needed in machinery automation.

It comprehends finger (14 mm) and hand (30 mm) detection capabilities, with heights that go up to 2250 mm, and multibeam models with 2, 3 and 4 beams with the usual heights of 500, 800, 900 and 1200 mm.

Models for body protection are also available with active/passive operating principle, meaning that only one side needed to be connected with a cable.

For all these models, four different level of functionalities can be chosen depending on the safety functions needed:

- Base, when simple detection and automatic restart are sufficient.
- Standard, for the simplest functions, such as manual restart and external device monitoring (EDM)

- Standard Muting, in which 2-signals muting can be set up with DIP switches when it is needed a passage of material through the curtain.
- Advanced, in which the maximum flexibility is reached, and all functions can be activated and parametrized through programming.

SH4 line comprehends also Cascade units, that can be connected to main units inheriting automatically their functional level in order to build up a system with up to three units, also with different detection capabilities.

All models belonging to SH4 series, independently from functionality level or detection capability, use the same housing profile: this means that they share characteristics, dimensions and accessories and customers can easily pass from one model to another one following their necessities.

| Type | Resolution (mm) | Range (m) | Height (mm) | Special Features | Functions | Additional HW features | Version |

SAFETY LIGHT CURTAINS

Datasensing portfolio includes several series of light curtains with finger and hand detection capabilities, differentiated by dimensions, material, features, functionality level and communication characteristics.

SG2 and SG4 series have slightly different versions depending on safety level and functions, SG4 EXTENDED being the most flexible, with zero dead zone and optional programming.

SLIM characteristics are the extremely thin profile and the many heights, for applications where the mechanical fitting into the machine is the main driver.

SG4-H is a IP69K and hygienic designed stainless steel light curtains for the Pharmaceutical Industry.

SG4 FIELDBUS is the only safety light curtain on the market with integrated openSAFETY over POWERLINK communication.

**** The safety functions have to be implemented in the safety PLC that read the status of the light curtain through openSAFETY

SAFETY LIGHT GRIDS

For body protection, SG BODY COMPACT and SG BODY BIG, both in type 2 and 4 can be chosen based on desired dimension, maximum range and functionality level, where mainly the muting function can be a differentiator.

The Active/Passive operating mode is the characteristic of SG REFLECTOR.

Same body protection and muting functions, as well as more free installations, can be reached using single sensors both cylindrical and rectangular, like S5, SL5, S300 and SH/TH in combination with their safety control unit.

SH4 Base

TYPE 4 SAFETY LIGHT CURTAIN WITH BASIC FUNCTIONALITY

Base version of SH4, a complete family of state-of-the-art safety light curtains, covering all resolutions and functionality levels.

- Finger protection (14 mm)Hand protection (30 mm)
- Body protection (2, 3 or 4 beams)
- Improved operating range: up to 70 m
- Basic functions: alignment, automatic restart
- Monitored height (finger/hand): from 300 to 2250 mm
- Monitored height (body): 500, 800, 900 and 1200 mm
- Compact profile (35 x 40 mm), common to all SH4 line
- Installation eased by LEDs indications of beam intensity
- Optical synchronization with 2 beams
- IP67 Protection
- -30 ... +55 °C Operating temperature
- Complete pair of emitter and receiver and angular brackets included in the package
- Pigtails with M12 connectors with standard not shielded cables

- Automatic machinery
- Material handling
- Processing & packaging machines
- Automotive, metalworking, presses
- Palletizers
- Automatic assembly machines and lines

INTERACTIVE INDEX

SH4 Standard

TYPE 4 SAFETY LIGHT CURTAIN WITH STANDARD FUNCTIONALITY

Standard version of SH4, a complete family of state-of-the-art safety light curtains, covering all resolutions and functionality levels. Standard models provide EDM and auto/manual restart.

- Finger protection (14 mm)
- Hand protection (30 mm)
- Body protection (2, 3 or 4 beams)
- Improved operating range: up to 70 m
- Basic functions: alignment, automatic restart
- Standard functions: manual restart, EDM
- Monitored height (finger/hand): from 300 to 2250 mm
- Monitored height (body): 500, 800, 900 and 1200 mm
- Compact profile (35 x 40 mm), common to all SH4 line
- Installation eased by LEDs indications of beam intensity
- Optical synchronization with 2 beams
- IP67 Protection
- -30 ... +55 °C Operating temperature
- Zero dead zone
- Complete pair of emitter and receiver and angular brackets included in the package
- Pigtails with M12 connectors with standard not shielded cables

- Automatic machinery
- Material handling
- Processing & packaging machines
- Automotive, metalworking, presses
- Palletizers
- Automatic assembly machines and lines

SH4 Standard Muting

TYPE 4 SAFETY LIGHT CURTAIN WITH MUTING FUNCTIONALITY

Standard Muting version of SH4, a complete family of state-of-the-art safety light curtains, covering all resolutions and functionality levels. These models provide 2-signals mono and bidirectional muting.

- Finger protection (14 mm)
- Hand protection (30 mm)
- Body protection (2, 3 or 4 beams)
- Improved operating range: up to 70 m
- Basic functions: alignment, automatic restart
- Standard functions: manual restart, EDM
- Standard Muting functions: 2-signals mono and bidirectional muting, override
- Configuration of functions with DIP-SW
- Monitored height (finger/hand): from 300 to 2250 mm
- Monitored height (body): 500, 800, 900 and 1200 mm
- Compact profile (35 x 40 mm), common to all SH4 line
- Installation eased by LEDs indications of beam intensity
- Optical synchronization with 2 beams
- IP67 Protection
- -30 ... +55 °C Operating temperature
- Zero dead zone
- Complete pair of emitter and receiver and angular brackets included in the package
- Anti-interference codes
- Muting accessories available with prewired and preinstalled muting sensors
- Cascadable with SH4 CASCADE up to three units
- Pigtails with M12 connectors with standard not shielded cables
- Integrated LED muting indication

45

SH4 Advanced

PROGRAMMABLE SAFETY LIGHT CURTAIN WITH INTEGRATED AIMERS

Advanced version of SH4, a complete family of state-of-the-art safety light curtains, covering all resolutions and functionality levels. The advanced version is characterized by full wi-fi programmability and by integrated alignment aimers.

- Finger protection (14 mm)
- Hand protection (30 mm)
- Body protection (2, 3 or 4 beams)
- Improved operating range: 10-70 m
- Basic functions: alignment, automatic restart
- Standard functions: manual restart, EDM
- Standard Muting functions: 2-signals mono and bidirectional muting, override
- Advanced functions: partial muting, dynamic partial muting, 4-signals muting
- Innovative wireless monitoring and configuration system
- Monitored height (finger/hand): from 300 to 2250 mm
- Monitored height (body): 500, 800, 900 and 1200 mm
- Compact profile (35 x 40 mm), common to all SH4 line
- Installation eased by LEDs indications of beam intensity
- Optical synchronization with 2 beams
- IP67 Protection
- -30 ... +55 °C Operating temperature
- Zero dead zone
- Simultaneous muting and blanking
- Complete pair of emitter and receiver and angular brackets included in the package
- Anti-interference codes
- Alignment eased with red LED
- Integrated LED muting indication
- Muting accessories available with prewired and preinstalled muting sensors
- Pigtails with M12 connectors with standard not shielded cables

- Automatic machinery
- Material handling
- Processing & packaging machines
- Automotive, metalworking, presses
- Palletizers
- Automatic assembly machines and lines

SH4 Active/Passive

TYPE 4 SAFETY LIGHT CURTAIN WITH ACTIVE/PASSIVE OPERATING PRINCIPLE

The active/passive version of SH4 safety light curtain, with base, standard and advanced functionality

- Type 4 safety light curtains with active/passive operating principle
- Body protection with 500, 800, 900, 1200 mm controlled height
- Up to 8 m operating range (depending on model)
- Basic functions: alignment, automatic restart
- Standard functions: manual restart, EDM
- Standard Muting functions: 2-signals mono and bidirectional muting, override
- Advanced functions: partial muting, 4-signals muting
- Innovative wireless monitoring and configuration system (depending on models)
- Compact profile (35 x 40 mm), common to all SH4 line
- Installation eased by LEDs indications of beam intensity
- IP67 Protection
- -30 ... +55 °C Operating temperature
- Complete pair of active and passive sides and angular brackets included in the package
- Anti-interference codes (depending on models)
- Integrated LED muting indication
- Muting accessories available with prewired and preinstalled muting sensors
- Pigtails with M12 connectors with standard not shielded cables

- Automatic machinery
- Material handling
- Processing & packaging machines
- Automotive, metalworking, presses
- Palletizers

SH4 Cascade

SAFETY LIGHT CURTAIN MODELS FOR CONNECTION WITH SH4 SERIES

Cascade version of SH4. They can be connected to SH4 Advanced and Standard Muting models reaching up to three units, inheriting the functional level of the main one.

- Cascade model, to be used with SH4 STANDARD MUTING or SH4 ADVANCED
- Finger protection (14 mm)
- Hand protection (30 mm)
- Improved operating range: up to 20 m
- Monitored height (finger/hand): from 300 to 2250 mm
- Compact profile (35 x 40 mm), common to all SH4 line
- Installation eased by LEDs indications of beam intensity
- Optical synchronization with 2 beams
- IP67 Protection
- -30 ... +55 °C Operating temperature
- Zero dead zone
- Complete pair of emitter and receiver and angular brackets included in the package
- Anti-interference codes
- Cascade cables up to 10 m
- Compatible with Standard Muting or Advanced model, inherits their functionality

- Automatic machinery
- Material handling
- Processing & packaging machines
- Automotive, metalworking, presses
- Palletizers
- Automatic assembly machines and lines

SLIM

**ULTRACOMPACT
SAFETY LIGHT
CURTAIN FINGER/HAND
RESOLUTION**

Ultra-compact safety light curtain with standard functionality, for applications where space saving and mechanical flexibility is a must.

- Highest mechanical flexibility for a perfect fit into machine structures
- Simple commissioning and maintenanceHigh functional performance
- SLIM profile: 15 x 32 mm
- Pigtail cable with 5-pole M12 connectors
- Same cable for Emitter and Receiver
- No Dead Zone14, 24 and 34 mm resolution
- 34 different protection lengths, with 30 mm modularity
- 3 different brackets shapes
- Cascadable up to 3 units
- Auto/Manual restart and EDM function configuration by wiring
- LED display messages diagnosis

- Automatic assembly machines & lines
- Primary packaging machinery
- Cutting machinery
- Automatic and semi-automatic quality inspection
- Material handling machinery

SG4 Base

**TYPE 4 SAFETY LIGHT
CURTAIN WITH BASIC
FUNCTIONALITY**

Type 4 finger and hand resolution light curtain for access and presence detection in dangerous machinery that require basic functions like manual restart and external device monitoring.

- High reliability
- Easy installation and alignment
- Cost effective finger, hand detection with basic functions
- Up to 19 m operating distance
- Compact dimensions (32.3 x 36.9 mm section)
- Anti-interference coding
- IP65 Protection; IP69K with optional tube
- Unshielded cables
- Rotating and anti-vibration brackets

- Automatic machinery
- Metalworking, Woodworking
- Manufacturing (textile, ceramics, etc)
- Material handling, assembly lines

SG4-N

**TYPE 4 SAFETY
LIGHT CURTAIN WITH
INTEGRATED MUTING
FUNCTION**

Safety light curtain with finger or hand resolution, integrated muting, retro compatible with SE series.

- No dead zone
- Pigtail cable with M12 connector
- Up to 20 m operating range and 1800 mm protected height
- Compact dimensions (35 x 41 mm section)
- Anti-interference coding
- Integrated Muting function
- Configurable with Push buttons for common configuration

- Automatic machines
- Robots
- Automatic assembling lines
- Palletizers and Depalletizers

SG4 Extended

TYPE 4 SAFETY
LIGHT CURTAIN
WITH ADVANCED
FUNCTIONALITY

Type 4 Finger and hand resolution safety light curtain with possibility of configuration of advanced functions through pushbuttons or Graphic User Interface.

- No dead zone
- Pigtail cable with M12 connector
- Cascade connection of up to 3 units
- Up to 20 m operating range and 1800 m protected height
- Compact dimensions (35 x 41 mm section)
- Anti-interference coding
- Integrated Muting function
- Floating Blanking, Fixed Blanking and Reduced Resolution
- Configurable with: Pushbuttons for common configuration
- Graphic User Interface for complete parameterization
- Ethernet Interface for programming, monitoring and error logging

- Processing and packaging machines
- Automotive, metalworking, presses
- Manufacturing assembly lines

SG4-H

IP69K STAINLESS
STEEL SAFETY LIGHT
CURTAIN FOR PHARMA

Finger protection in applications where high hygienic requirements need frequent cleanings with highly corrosive detergents.
The first safety light curtain with stainless steel housing and glass.

- Stainless steel housing
- Hygienic design
- No need for additional protection tubes!
- P69K full protection
- Housing: AISI316L stainless steel with roughness under 0.8 micron
- Window: Optical glass
- Rounded surfaces with no gaps or sharp edges
- No labels: All information laser marked
- Maximum safety: Type 4, finger resolution
- Three protection heights: 150, 300 and 450 mm
- 50 x 30 mm profile
- 4 LEDs and 7-segment display alignment aiding

- Primary packaging and filling machinery
- Liquid aseptic processing: syringe filling
- Solid dose processing: tablet blistering
- RABS (Restricted Access Barrier Systems)

SG4 Fieldbus

SAFETY LIGHT CURTAIN
WITH POWERLINK
FIELDBUS

Safety light curtain with integrated openSAFETY over POWERLINK protocol. Complete diagnostic and monitoring available over the communication bus. Doesn't require programming: safety functions are managed in safety PLC using information sent by the light curtain.

- Fast and easy installation, configuration and maintenance
- Complete diagnostic and monitoring available over the communication bus
- Basic models: classic functions available
- Advanced models: each beam status safe information available
- Two M12 connectors on receiver side for POWERLINK connection
- M8 connectors on emitter and receiver for power supply
- Up to 19 m operating range and 1800 m protected height
- Finger, hand and body protection
- Compact dimensions (35 x 42 mm section)
- POWERLINK node address configurable with selector switches
- Functions available in combination with B&R safety controller SL and SLX: auto/manual restart, EDM, Muting, Override
- Functions available for advanced models in combination with B&R safety controller SL: fixed blanking, floating blanking, partial and dynamic muting, warning areas, measurement

- Automatic and semi-automatic machines and lines
- Primary packaging machinery (packing, filling, labelling, etc...)
- Cutting machinery
- Bending and metal-working machines
- Material handling machinery
- Palletizers and depalletizers
- Material handling
- Robots cells

SG2 Base

TYPE 2 SAFETY LIGHT CURTAIN WITH BASIC FUNCTIONALITY

Safety light curtain for hand, arm and presence detection with basic functions.
High reliability, easy installation and alignment, cost effective solution for simple protection needs.

- High reliability
- Easy installation and alignment
- Cost effective
- Finger, hand, arm detection with basic functions
- 90 mm version for presence detection
- Up to 19 m operating distance
- Compact dimensions (32.3 x 36.9 mm section)
- Anti-interference coding
- IP65 Protection
- Unshielded cables
- Rotating and anti-vibration brackets

- Automatic machinery
- Metalworking, Woodworking
- Manufacturing (textile, ceramics, etc)
- Material handling, assembly lines

SG2 Extended

TYPE 2 SAFETY LIGHT CURTAIN WITH STANDARD FUNCTIONALITY

Finger and hand presence safety detection with manual restart and EDM functionalities.

- High reliability
- Easy installation and alignment
- Cost effective Finger, hand, arm detection with standard functions
- 90 mm version for presence detection
- Up to 19 m operating distance
- Compact dimensions (32.3 x 36.9 mm section)
- Anti-interference coding
- IP65 Protection; IP69K with optional tube
- Unshielded cables
- Rotating and anti-vibration brackets

- QR code.
- Automatic machinery
 - Metalworking, Woodworking
 - Manufacturing (textile, ceramics, etc)
 - Material handling, assembly lines

SG2 Muting

TYPE 2 SAFETY LIGHT CURTAIN FOR HAND DETECTION WITH MUTING

Type 2 finger and hand presence safety detection with zero dead zone and integrated muting, configurable with pushbuttons.

- No dead zone
- Pigtail cable with M12 connector
- Up to 20 m operating range and 1800 m protected height
- Compact dimensions (35 x 41 mm section)
- Anti-interference coding
- Integrated Muting function
- Configurable with Push buttons

- Automatic machinery
- Metalworking, Woodworking
- Manufacturing (textile, ceramics, etc)
- Material handling, assembly lines

SG Body Compact Base / Muting

COMPACT TYPE 2 AND TYPE 4 SAFETY LIGHT GRID FOR BODY DETECTION

Safety light curtain with compact housing and long operating range, ideal for access or perimeter control.

Integrated muting and override functions.

- Body access detection
- Perimeter control
- Rapid solution for access control with muting
- Easy installation and alignment
- L and T muting models provided with Retroreflective Muting Arms
- Two, three or four beams for body protection
- Controlled heights of 500, 800, 900 and 1200 mm
- Long operating distance: up to 50 m
- Simple configuration through DIP switches
- Integrated muting lamp (only on muting models)

- Automatic machines
- Robots
- Automatic assembly lines
- Palletizers and depalletizers
- Material handling

SG Body Big Base / Muting

ROBUST TYPE 2 AND TYPE 4 SAFETY LIGHT GRID FOR BODY AND ARM DETECTION

Safety light curtain with robust housing and long operating range, ideal for harsh environments and perimeter control.

Access control is eased by integrated muting and override functions.

Integrated muting lamp.

- Robust housing for harsh environments
- Long operating range for perimeter control
- Rapid solution for access control with muting
- Easy installation and alignment
- 2, 3, 4 beams for body protection
- 40 mm resolution for arm protection and presence detection
- Controlled heights 500, 800, 900 and 1200 mm
- Long operating distance: up to 60 m
- Simple configuration through DIP switches
- Integrated muting lamp (only muting models)
- Anti-interference coding
- External muting enable signal
- Edged or triggered muting dependent override

- Automatic machines
- Robots
- Automatic assembly lines
- Palletizers and depalletizers
- Material handling

SG Body Reflector Base / Muting

RETROREFLECTIVE TYPE 4 SAFETY LIGHT GRID FOR BODY DETECTION

Sturdy safety light curtain for body protection with only one active side.

Access control is eased by integrated muting and override functions.

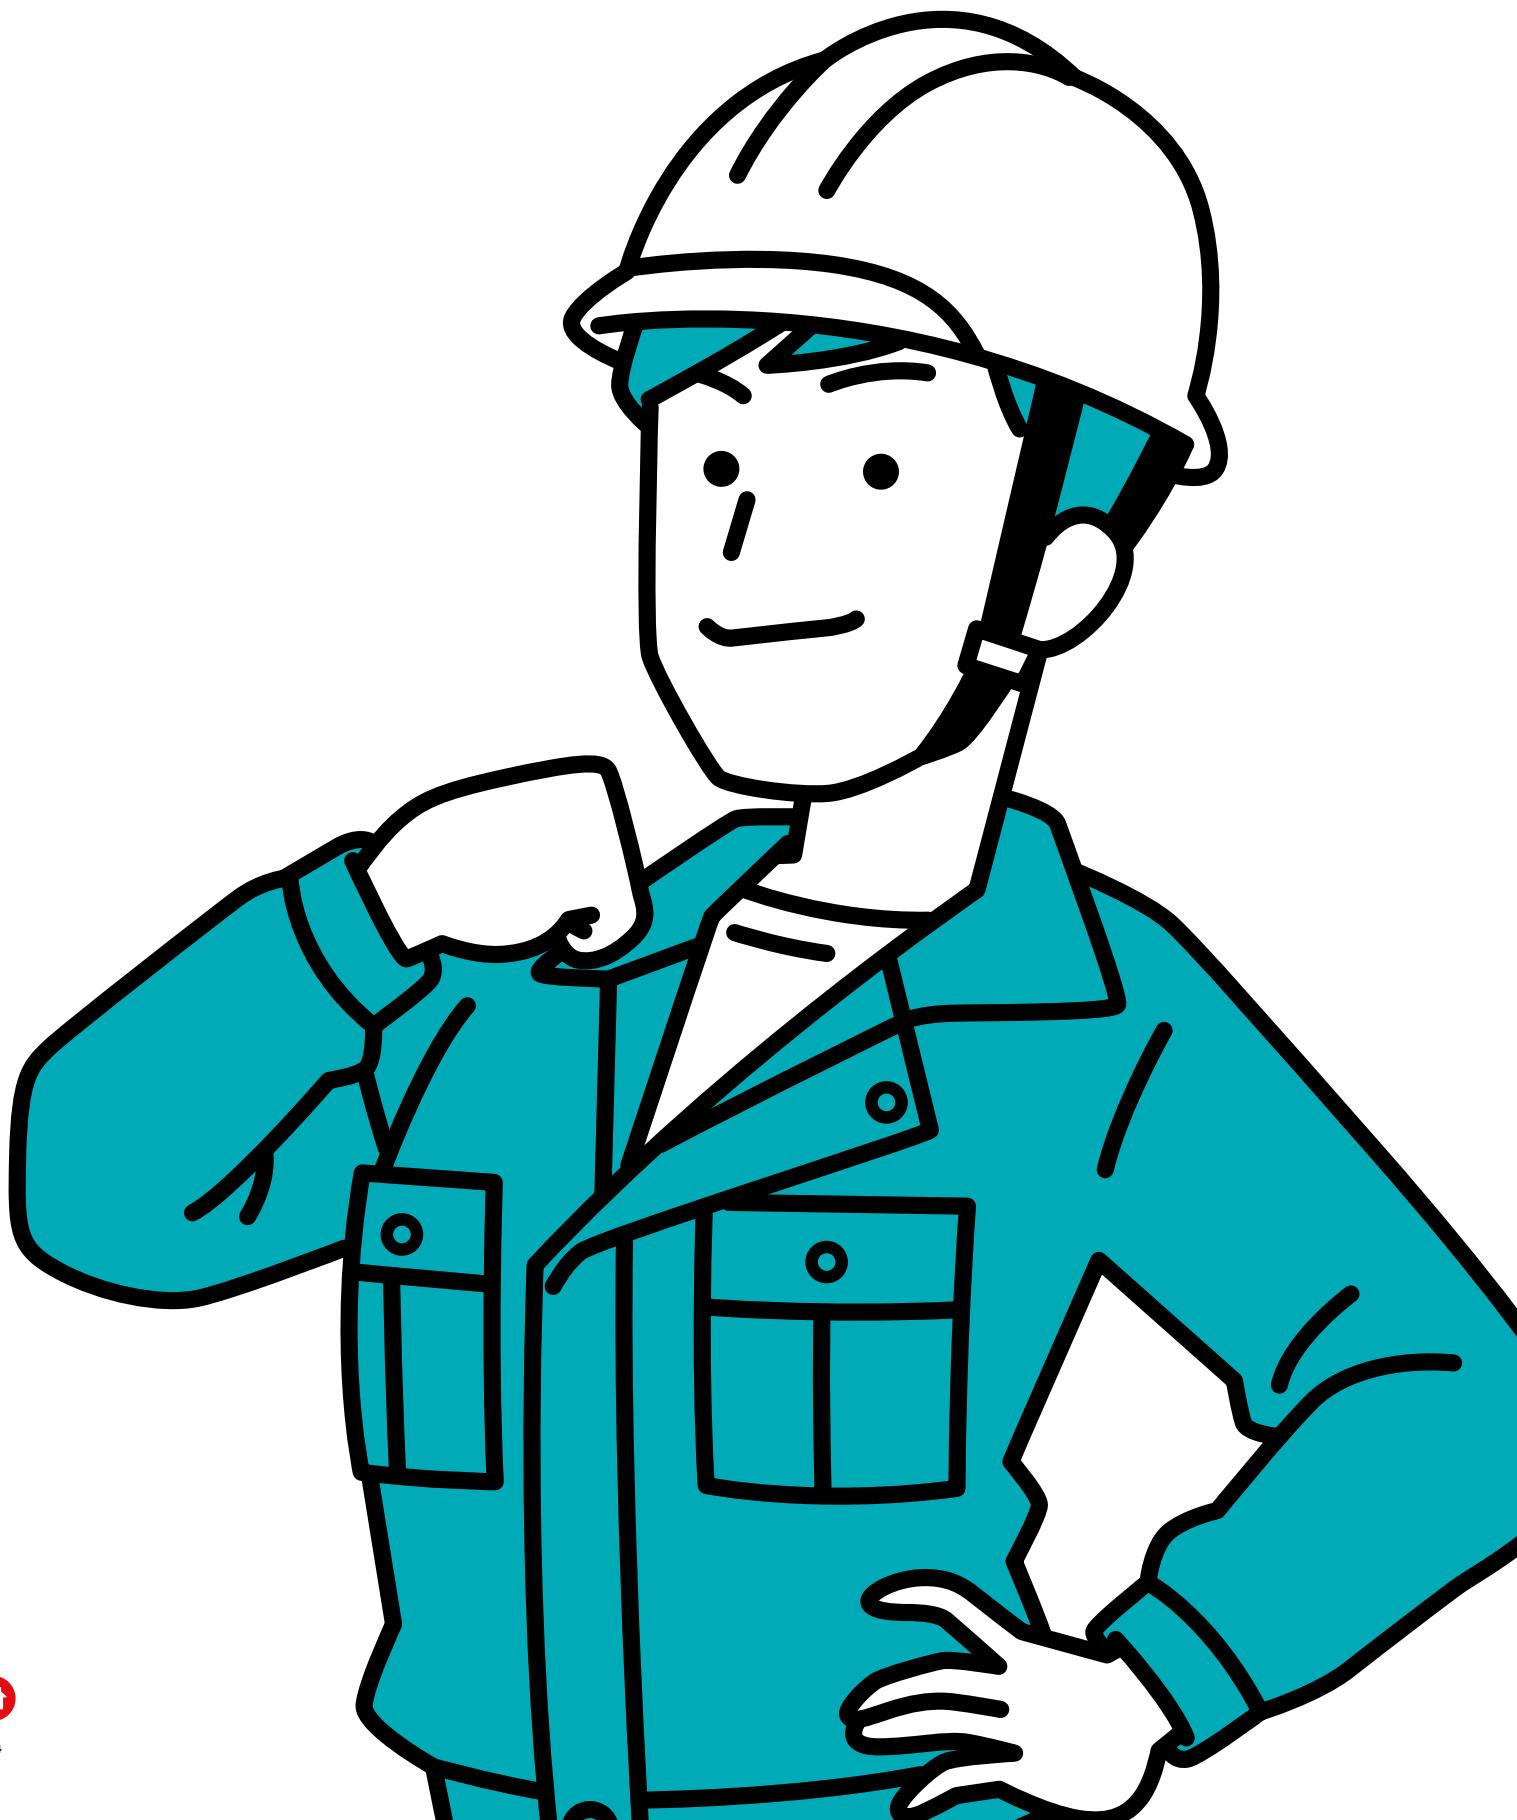

Integrated muting lamp.

- One active and one passive unit to reduce wiring and installation costs
- Robust housing for harsh environments
- Easy installation and alignment
- Reflective muting arms included in L and T muting version
- All advanced features associated to muting function
- 2, 3, 4 beams for body protection
- Controlled heights 500, 800, 900 and 1200 mm
- Up to 8 m operating distance
- Simple configuration through DIP switches
- Integrated muting lamp (muting models)
- Anti-interference coding
- External muting enable signal
- Edged or triggered muting dependent override

- Automatic machines
- Robots
- Automatic assembly lines
- Palletizers and depalletizers
- Material handling

SH4 Base

TYPE 4 SAFETY LIGHT CURTAIN WITH BASIC FUNCTIONALITY

Base version of SH4, a complete family of state-of-the-art safety light curtains, covering all resolutions and functionality levels.

- Finger protection (14 mm)
- Hand protection (30 mm)
- Body protection (2, 3 or 4 beams)
- Improved operating range: up to 70 m
- Basic functions: alignment, automatic restart
- Monitored height (finger/hand): from 300 to 2250 mm
- Monitored height (body): 500, 800, 900 and 1200 mm

- Compact profile (35 x 40 mm), common to all SH4 line
- Installation eased by LEDs indications of beam intensity
- Optical synchronization with 2 beams
- IP67 Protection
- -30 ... +55 °C Operating temperature
- Complete pair of emitter and receiver and angular brackets included in the package
- Pigtails with M12 connectors with standard not shielded cables

SAFETY LIGHT CURTAINS

SH4 Standard

TYPE 4 SAFETY LIGHT CURTAIN WITH STANDARD FUNCTIONALITY

Standard version of SH4, a complete family of state-of-the-art safety light curtains, covering all resolutions and functionality levels. Standard models provide EDM and auto/manual restart.

- Finger protection (14 mm)
- Hand protection (30 mm)
- Body protection (2, 3 or 4 beams)
- Improved operating range: up to 70 m
- Basic functions: alignment, automatic restart
- Standard functions: manual restart, EDM
- Monitored height (finger/hand): from 300 to 2250 mm

- Monitored height (body): 500, 800, 900 and 1200 mm
- Compact profile (35 x 40 mm), common to all SH4 line
- Installation eased by LEDs indications of beam intensity
- Optical synchronization with 2 beams
- IP67 Protection
- -30 ... +55 °C Operating temperature
- Zero dead zone
- Complete pair of emitter and receiver and angular brackets included in the package
- Pigtails with M12 connectors with standard not shielded cables

NOTE : When using CS-ME, connect EDM input, and be sure EDM function is active on the safety light curtain.

SH4 Standard Muting

TYPE 4 SAFETY LIGHT CURTAIN WITH MUTING FUNCTIONALITY

Standard Muting version of SH4, a complete family of state-of-the-art safety light curtains, covering all resolutions and functionality levels. These models provide 2-signals mono and bidirectional muting.

- Finger protection (14 mm)
- Hand protection (30 mm)
- Body protection (2, 3 or 4 beams)
- Improved operating range: up to 70 m
- Basic functions: alignment, automatic restart
- Standard functions: manual restart, EDM
- Standard Muting functions: 2-signals mono and bidirectional muting, override
- Configuration of functions with DIP-SW
- Monitored height (finger/hand): from 300 to 2250 mm
- Monitored height (body): 500, 800, 900 and 1200 mm

- Compact profile (35 x 40 mm), common to all SH4 line
- Installation eased by LEDs indications of beam intensity
- Optical synchronization with 2 beams
- IP67 Protection
- -30 ... +55 °C Operating temperature
- Zero dead zone
- Complete pair of emitter and receiver and angular brackets included in the package
- Anti-interference codes
- Muting accessories available with prewired and preinstalled muting sensors
- Cascadable with SH4 CASCADE up to three units
- Pigtails with M12 connectors with standard not shielded cables
- Integrated LED muting indication

NOTE : When using CS-ME, connect EDM input, and be sure EDM function is active on the safety light curtain.

SH4 Advanced

PROGRAMMABLE SAFETY LIGHT CURTAIN WITH INTEGRATED AIMERS

Advanced version of SH4, a complete family of state-of-the-art safety light curtains, covering all resolutions and functionality levels. The advanced version is characterized by full wi-fi programmability and by integrated alignment aimers.

- Finger protection (14 mm)
- Hand protection (30 mm)
- Body protection (2, 3 or 4 beams)
- Improved operating range: 10-70 m
- Basic functions: alignment, automatic restart
- Standard functions: manual restart, EDM
- Standard Muting functions: 2-signals mono and bidirectional muting, override
- Advanced functions: partial muting, dynamic partial muting, 4-signals muting
- Innovative wireless monitoring and configuration system
- Monitored height (finger/hand): from 300 to 2250 mm

- Monitored height (body): 500, 800, 900 and 1200 mm
- Compact profile (35 x 40 mm), common to all SH4 line
- Installation eased by LEDs indications of beam intensity
- Optical synchronization with 2 beams
- IP67 Protection
- -30 ... +55 °C Operating temperature
- Zero dead zone
- Simultaneous muting and blanking
- Complete pair of emitter and receiver and angular brackets included in the package
- Anti-interference codes
- Alignment eased with red LED
- Integrated LED muting indication
- Muting accessories available with prewired and preinstalled muting sensors
- Pigtails with M12 connectors with standard not shielded cables

NOTE : When using CS-ME, connect EDM input, and be sure EDM function is active on the safety light curtain.

SH4 Active/ Passive

TYPE 4 SAFETY LIGHT CURTAIN WITH ACTIVE/PASSIVE OPERATING PRINCIPLE

The active/passive version of SH4 safety light curtain, with base, standard and advanced functionality

- Type 4 safety light curtains with active/passive operating principle
- Body protection with 500, 800, 900, 1200 mm controlled height
- Up to 8 m operating range (depending on model)
- Basic functions: alignment, automatic restart
- Standard functions: manual restart, EDM
- Standard Muting functions: 2-signals mono and bidirectional muting, override
- Advanced functions: partial muting, 4-signals muting
- Innovative wireless monitoring and configuration system (depending

- on models)
- Compact profile (35 x 40 mm), common to all SH4 line
- Installation eased by LEDs indications of beam intensity
- IP67 Protection
- -30 ... +55 °C Operating temperature
- Complete pair of active and passive sides and angular brackets included in the package
- Anti-interference codes (depending on models)
- Integrated LED muting indication
- Muting accessories available with prewired and preinstalled muting sensors
- Pigtails with M12 connectors with standard not shielded cables

NOTE : When using CS-ME, connect EDM input, and be sure EDM function is active on the safety light curtain.

SH4 Cascade

SAFETY LIGHT CURTAIN MODELS FOR CONNECTION WITH SH4 SERIES

Cascade version of SH4. They can be connected to SH4 Advanced and Standard Muting models reaching up to three units, inheriting the functional level of the main one.

- Cascade model, to be used with SH4 STANDARD MUTING or SH4 ADVANCED
- Finger protection (14 mm)
- Hand protection (30 mm)
- Improved operating range: up to 20 m
- Monitored height (finger/hand): from 300 to 2250 mm
- Compact profile (35 x 40 mm), common to all SH4 line

- Installation eased by LEDs indications of beam intensity • Optical synchronization with 2 beams
- IP67 Protection
- -30 ... +55 °C Operating temperature
- Zero dead zone
- Complete pair of emitter and receiver and angular brackets included in the package
- Anti-interference codes
- Cascade cables up to 10 m
- Compatible with Standard Muting or Advanced model, inherits their functionality

SH4 Cascade

SAFETY LIGHT CURTAINS

SLIM

ULTRACOMPACT SAFETY LIGHT CURTAIN FINGER/HAND RESOLUTION

Ultra-compact safety light curtain with standard functionality, for applications where space saving and mechanical flexibility is a must.

- Highest mechanical flexibility for a perfect fit into machine structures
- Simple commissioning and maintenance
- SLIM profile: 15 x 32 mm
- Pigtail cable with 5-pole M12 connectors

- Same cable for Emitter and Receiver
- No Dead Zone
- 14, 24 and 34 mm resolution
- 34 different protection lengths, with 30 mm modularity
- 3 different brackets shapes
- Cascadable up to 3 units
- Auto/Manual restart and EDM function configuration by wiring
- LED display messages diagnosis

TECHNICAL SPECIFICATIONS

SLIM

SAFETY LIGHT CURTAINS

| | SL2-**-****-E | SL4-**-****-E |
|----------------------------------|---|---|
| |    |    |
| GENERAL DATA | | |
| Operating principle | Emitter + Receiver | |
| Detection capability | 14, 24, 34 mm | |
| MONITORED AREA | | |
| Nominal sensing distance | 0.2 ... 6 m | |
| Controlled height | 150 ... 1200 mm | |
| EMISSION DATA | | |
| Emission | Infrared LED (850nm) | |
| Effective beam angle | $\leq \pm 5^\circ$ | $\leq \pm 2.5^\circ$ |
| FUNCTIONS | | |
| Available functions | Manual/Automatic Restart, EDM | |
| SAFETY PARAMETERS | | |
| Type | 2 | 4 |
| Pl | c | e |
| SIL | SIL 1 (IEC 61508) | SIL 3 (IEC 61508) |
| INPUT/OUTPUT | | |
| Output type | 2 x PNP (OSSD safety output) with EDM | |
| ELECTRICAL DATA | | |
| Supply voltage | 24 Vdc $\pm 20\%$ | |
| Power consumption - Emitter | ≤ 1.6 W | |
| Power consumption - Receiver | ≤ 4.2 W without load | |
| Maximum DC load current | 300 mA each output | |
| Response time (Master + Slave) | 18 ms | |
| Response time (Master + 2 Slave) | 20 ms | |
| MECHANICAL DATA | | |
| Dimensions | 15.4 x 32.6 x (150 ... 1200) mm | |
| Material | Metal - Aluminium / PMMA / Painted Zamak | |
| Connections | M12-5 poles pig-tail (emitter) M12-5 poles pig-tail (receiver) | |
| Length of cables (Power) | ≤ 20 m | |
| CERTIFICATIONS | | |
| Shocks | 16 ms (10 G) 1,000 shocks per axis (EN 60068-2-29) | |
| Vibrations | Width 0.35 mm, frequency 10 ... 55Hz; 20 sweep per axis, 1 octave/min (EN 60068-2-6) | |
| Electromagnetic compatibility | IEC EN 60947-5-2 | |
| ENVIRONMENTAL DATA | | |
| Operating Temperature | -10 ... 55 °C | |
| Storage temperature max. | -25 ... 70 °C | |
| Mechanical Protection | IP65 | |
| Humidity | 15 ... 95 % no condensation | |
| Ambient light immunity | According to IEC 61496-2 | |

NOTE 1: In SLIM package are already included C-shaped brackets (ST-K2-SL-C) and O-shaped brackets (ST-K4-SL-O).

NOTE 2: When using CS-ME, connect EDM input, and be sure EDM function is active on the safety light curtain.

SG4 Base

TYPE 4 SAFETY LIGHT CURTAIN WITH BASIC FUNCTIONALITY

Type 4 finger and hand resolution light curtain for access and presence detection in dangerous machinery that require basic functions like manual restart and external device monitoring.

- High reliability
- Easy installation and alignment
- Cost effective finger, hand detection with basic functions

- Up to 19 m operating distance
- Compact dimensions (32.3 x 36.9 mm section)
- Anti-interference coding
- IP65 Protection; IP69K with optional tube
- Unshielded cables
- Rotating and anti-vibration brackets

SG4-N

TYPE 4 SAFETY LIGHT CURTAIN WITH INTEGRATED MUTING FUNCTION

Safety light curtain with finger or hand resolution, integrated muting, retro compatible with SE series.

- No dead zone
- Pigtail cable with M12 connector
- Up to 20 m operating range and 1800 mm protected height
- Compact dimensions (35 x 41 mm section)
- Anti-interference coding
- Integrated Muting function
- Configurable with Push buttons for common configuration

NOTE : When using CS-ME, connect EDM input, and be sure EDM function is active on the safety light curtain.

SG4 Extended

TYPE 4 SAFETY LIGHT CURTAIN WITH ADVANCED FUNCTIONALITY

Type 4 Finger and hand resolution safety light curtain with possibility of configuration of advanced functions through pushbuttons or Graphic User Interface.

- No dead zone
- Pigtail cable with M12 connector
- Cascade connection of up to 3 units
- Up to 20 m operating range and 1800 m protected height

- Compact dimensions (35 x 41 mm section)
- Anti-interference coding
- Integrated Muting function
- Floating Blanking, Fixed Blanking and Reduced Resolution
- Configurable with: Pushbuttons for common configuration
- Graphic User Interface for complete parametrization
- Ethernet Interface for programming, monitoring and error logging

IP69K STAINLESS STEEL SAFETY LIGHT CURTAIN FOR PHARMA

Finger protection in applications where high hygienic requirements need frequent cleanings with highly corrosive detergents. The first safety light curtain with stainless steel housing and glass.

- Stainless steel housing
- Hygienic design
- No need for additional protection tubes!
- P69K full protection

- Housing: AISI316L stainless steel with roughness under 0.8 micron
- Window: Optical glass
- Rounded surfaces with no gaps or sharp edges
- No labels: All information laser marked
- Maximum safety: Type 4, finger resolution
- Three protection heights: 150, 300 and 450 mm
- 50 x 30 mm profile
- 4 LEDs and 7-segment display alignment aiding

SG4 Fieldbus

SAFETY LIGHT CURTAIN WITH POWERLINK FIELDBUS

Safety light curtain with integrated openSAFETY over POWERLINK protocol. Complete diagnostic and monitoring available over the communication bus. Doesn't require programming: safety functions are managed in safety PLC using information sent by the light curtain.

- Fast and easy installation, configuration and maintenance
- Complete diagnostic and monitoring available over the communication bus
- Basic models: classic functions available
- Advanced models: each beam status safe information available
- Two M12 connectors on receiver side for POWERLINK connection

- M8 connectors on emitter and receiver for power supply
- Up to 19 m operating range and 1800 m protected height
- Finger, hand and body protection
- Compact dimensions (35 x 42 mm section)
- POWERLINK node address configurable with selector switches
- Functions available in combination with B&R safety controller SL and SLX: auto/manual restart, EDM, Muting, Override
- Functions available for advanced models in combination with B&R safety controller SL: fixed blanking, floating blanking, partial and dynamic muting, warning areas, measurement

COMPATIBILITY WITH B&R HARDWARE AND SOFTWARE

Due to the characteristics of the functional blocks that have been developed by B&R in order to communicate with DATALOGIC SG4 FIELDBUS safety light curtains, always check to have the following versions or newer:

1) SG4 Fieldbus Base:

HW: SafeLOGIC SL81xx, SLxxxx

SW: SafetyRelease 1.10, SafeDESIGNER 4.2.x, Automation Studio 4.2.8.x, SL Upgrades 1.10.x.x

2) SG4 Fieldbus Advanced:

HW: SL81xx only

SW: SafetyRelease 1.10, SafeDESIGNER 4.3.3, Automation Studio 4.3.3, SL Upgrades 1.10.2.x

WEBSITE

SG2 Base

TYPE 2 SAFETY LIGHT CURTAIN WITH BASIC FUNCTIONALITY

Safety light curtain for hand, arm and presence detection with basic functions. High reliability, easy installation and alignment, cost effective solution for simple protection needs.

- High reliability
- Easy installation and alignment
- Cost effective
- Finger, hand, arm detection with basic functions

- 90 mm version for presence detection
- Up to 19 m operating distance
- Compact dimensions (32.3 x 36.9 mm section)
- Anti-interference coding
- IP65 Protection
- Unshielded cables
- Rotating and anti-vibration brackets

MECHANICAL DRAWINGS

SG2--***-00-X**

The technical drawing illustrates the physical dimensions of the SG2 Base safety light curtain. The front view shows a rectangular frame with a height of 14 mm, a top rail width of 38 mm, and side wall thicknesses of 50.5 mm. The overall width is labeled L1 and the distance between the inner vertical supports is labeled L2. A cross-sectional view on the right shows the internal structure with a total width of 32.3 mm and a base height of 36.9 mm. Mounting holes are indicated with a diameter of Ø 16 mm and a note M2 n°3 x 2.

TYPE 2 SAFETY LIGHT CURTAIN WITH STANDARD FUNCTIONALITY

Finger and hand presence safety detection with manual restart and EDM functionalities.

- High reliability Easy installation and alignment
- Cost effective Finger, hand, arm detection with standard functions
- 90 mm version for presence detection

- Up to 19 m operating distance
- Compact dimensions (32.3 x 36.9 mm section)
- Anti-interference coding
- IP65 Protection; IP69K with optional tube
- Unshielded cables
- Rotating and anti-vibration brackets

CODE DESCRIPTION

SG 2 - 30 - 015 - 00 - E-C

TECHNICAL SPECIFICATIONS

SG2 Extended

SAFETY LIGHT CURTAINS

SG2-**-***-00-E-C

| GENERAL DATA | |
|-------------------------------|--|
| Operating principle | Emitter + Receiver |
| Detection capability | 30, 50, 90 mm |
| MONITORED AREA | |
| Nominal sensing distance | 0.2 ... 19 m |
| Controlled height | 150 ... 1800 mm |
| EMISSION DATA | |
| Emission | Infrared LED (850nm) |
| Effective beam angle | $\leq \pm 5^\circ$ |
| FUNCTIONS | |
| Available functions | Manual/Automatic Restart, EDM, Range Reduction (on TX) |
| SAFETY PARAMETERS | |
| Type | 2 |
| Pl | c |
| SIL | SIL 1 (IEC 61508) |
| INPUT/OUTPUT | |
| Output type | 2 x PNP (OSSD safety output) with EDM |
| ELECTRICAL DATA | |
| Supply voltage | 24 Vdc $\pm 20\%$ |
| Power consumption - Emitter | ≤ 2 W |
| Power consumption - Receiver | ≤ 3 W without load |
| Maximum DC load current | 500 mA each output |
| Capacitive load tolerated | $\geq 2.2 \mu F$ |
| MECHANICAL DATA | |
| Dimensions | 32.3 x 36.9 x (150 ... 1800) mm |
| Material | Painted aluminum / PMMA / PC MAKROLON |
| Connections | M12-4 poles (emitter) M12-8 poles (receiver) |
| Length of cables (Power) | ≤ 50 m |
| CERTIFICATIONS | |
| Shocks | 16 ms (10 G) 1,000 shocks per axis (EN 60068-2-29) |
| Vibrations | Width 0.35 mm, frequency 10 ... 55Hz; 20 sweep per axis, 1 octave/min (EN 60068-2-6) |
| Electromagnetic compatibility | IEC EN 60947-5-2 |
| ENVIRONMENTAL DATA | |
| Operating Temperature | -10 ... 55 °C |
| Storage temperature max. | -25 ... 70 °C |
| Mechanical Protection | IP65 |
| Humidity | 15 ... 95 % no condensation |
| Ambient light immunity | According to IEC 61496-2 |

NOTE : When using CS-ME, connect EDM input, and be sure EDM function is active on the safety light curtain.

SG2 Muting

TYPE 2 SAFETY LIGHT CURTAIN FOR HAND DETECTION WITH MUTING

Type 2 finger and hand presence safety detection with zero dead zone and integrated muting, configurable with pushbuttons.

- No dead zone
- Pigtail cable with M12 connector
- Up to 20 m operating range and 1800 m protected height
- Compact dimensions (35 x 41 mm section)
- Anti-interference coding
- Integrated Muting function
- Configurable with Push buttons

SG BODY COMPACT BASE / MUTING

COMPACT TYPE 2 AND TYPE 4 SAFETY LIGHT GRID FOR BODY DETECTION

Safety light curtain with compact housing and long operating range, ideal for access or perimeter control.

Integrated muting and override functions.

- Body access detection
- Perimeter control
- Rapid solution for access control with muting

- Easy installation and alignment
- L and T muting models provided with Retroreflective Muting Arms
- Two, three or four beams for body protection
- Controlled heights of 500, 800, 900 and 1200 mm
- Long operating distance: up to 50 m
- Simple configuration through DIP switches
- Integrated muting lamp (only on muting models)

SG BODY BIG BASE / MUTING

ROBUST TYPE 2 AND TYPE 4 SAFETY LIGHT GRID FOR BODY AND ARM DETECTION

Safety light curtain with robust housing and long operating range, ideal for harsh environments and perimeter control. Access control is eased by integrated muting and override functions. Integrated muting lamp.

- Robust housing for harsh environments
- Long operating range for perimeter control
- Rapid solution for access control with muting
- Easy installation and alignment

- 2, 3, 4 beams for body protection
- 40 mm resolution for arm protection and presence detection
- Controlled heights 500, 800, 900 and 1200 mm
- Long operating distance: up to 60 m
- Simple configuration through DIP switches
- Integrated muting lamp (only muting models)
- Anti-interference coding
- External muting enable signal
- Edged or triggered muting dependent override

NOTE : When using CS-ME, connect EDM input, and be sure EDM function is active on the safety light curtain.

SG BODY REFLECTOR BASE / MUTING

RETROREFLECTIVE TYPE 4

SAFETY LIGHT GRID FOR BODY DETECTION

Sturdy safety light curtain for body protection with only one active side. Access control is eased by integrated muting and override functions. Integrated muting lamp.

- One active and one passive unit to reduce wiring and installation costs
- Robust housing for harsh environments
- Easy installation and alignment
- Reflective muting arms included in L and T muting version
- All advanced features associated to muting function

- 2, 3, 4 beams for body protection
- Controlled heights 500, 800, 900 and 1200 mm
- Up to 8 m operating distance
- Simple configuration through DIP switches
- Integrated muting lamp (muting models)
- Anti-interference coding
- External muting enable signal
- Edged or triggered muting dependent override

SH/TH SAFETY DEVICE

- M18 Models 10 m (axial optic) and 5 m (radial optic) operating distance
- M30 models 60 m operating distance
- EN50100 Category 2 and Category 4 compliant
- LED indicators
- Plastic and Metal Housing
- Inputs and Outputs IEC61131-2 compliant and adaptable with any safety module
- To be used together with a Category 2 or Category 4 safety control unit to obtain a safety system EN ISO 13849 compliant

SAFETY CONTROL UNITS

SG-BWS

SAFETY CONTROL UNIT
FOR PHOTOELECTRIC
SENSORS WITH MUTING

- Integrated control of 4 or 8 single beams and 2 light curtains
- Simple DIP Switch configuration
- Muting functions can be assigned to light curtains or single beams
- EDM, auto/manual restart mode, T/L Muting configurable
- Compatible with sensors: S5-5-* SG-ST*, SL5-5-* SG-ST4, S300-PR-5-* SG-ST*

SBCR03

SAFETY DEVICE

- Up to 6 sets of safety photocells M18 (SH4-IA) or M30 (TH6-IA) interconnectable
- DIN RAIL Mounting
- Body protection and access control
- Cat. 2 according to EN 61496-1
- Cat. 2 / PL c according to EN ISO 13849-1; SIL CL 1 according to EN 62061 / IEC 61508
- Models with single/double channel Muting and Override functions
- Response time less than 5 ms
- 2 OSSD outputs

- Robots
- Automatic assembling lines
- Palletizers and Depalletizers

SAFETY DEVICE

- Up to 6 sets of safety photocells M18 (SH4-IA) or M30 (TH6-IA) interconnectable
- DIN RAIL Mounting
- Body protection and access control
- Cat. 2 according to EN 61496-1
- Cat. 2 / PL c according to EN ISO 13849-1; SIL CL 1 according to EN 62061 / IEC 61508
- Models with single/double channel Muting and Override functions
- Response time less than 5 ms
- 2 OSSD outputs

SAFETY CONTROL UNITS

SAFETY LASER SCANNERS

Enhanced Laser Sentinel

SAFETY LASER SCANNER

LASER SENTINEL is the innovative solution for safe area protection in a large variety of applications in automation and intralogistic industries.

It offers a complete and flexible solution for the safeguard of robotic cells, automated guided vehicles and general machinery.

- Safety laser scanner based on Time Of Flight measurement
- More than 72 m² safely monitored, with 5.5 m over 275°
- High detection performances in compact size
- Advanced dust filtering
- Easy programming with intuitive Graphic User Interface
- Dimensions (w,d,h): 102 , 112.5, 152 mm
- I/O connection with standard M12 cables
- Up to 3 simultaneous safety zones
- 2 Warning zones up to 40 m
- 30/40/50/70/150 mm selectable detection capability
- Up to 70 zone sets
- Partial dynamic muting
- Metal brackets allowing full orientation and fast replacement
- Advanced measurement data protocol
- Colour graphic display for monitoring and diagnostics
- Speed measurement with encoder in

- Processing machines.
- Metal working.
- Food and beverage applications.
- Application with increased temperature range requirements

Enhanced Laser Sentinel EVO

SAFETY LASER SCANNER FOR PROFINET AND PROFISAFE

Safety laser scanner based on Time of Flight measurement with command integration in Profinet/Profisafe fieldbus

- Type 3 / PL d / SIL 2
- Safety range : 5.5 m x 275°
- Profinet-Profisafe command integration
- Up to 8 simultaneous controlled area
- Up to 70 switchable zone sets
- Easy and fast configuration by DLSENTINEL Gui, including off line emulator
- Enhanced series complete set of functions

- Robot cells (pick and place, inspection, testing, welding, etc)
- Palletizers / depalletizers
- Open machinery, process lines
- Automated Guided Vehicles (AGV)
- Automated Guided Carts (AGC)
- Mobile Industrial Robots

ACCESSORIES

CS

CABLES FOR SENSORS

CE UK CA

The right connection for your photoelectric sensor for industrial environment

- M8 and M12, axial or radial female connectors
- Standard length cables: 2, 3, 5, 7, 10, 15, 25 or 50 m
- 3, 4, 5, 8 or 12 poles
- Shielded or unshielded models
- P.U.R. coated models for use in harsh environments
- P.V.C. coated models for standard use
- Standard M12 4 pole non-cabled connectors
- The cable jacket maybe marked 300 V only as insulation voltage between wires, the operational voltage is 24 Vdc or 10-30 Vdc, less than 80 V required by CCC-China

M12-8p M to M12-8p M cable with (5 or 10 or 20) m length for master-remote and remote-remote connection

**CE UK
CA**

245

247

227

ST MOUNTING BRACKET

- Fixing brackets for universal sensors
- Fixed supports for tubular M18 sensors
- Supports with optic axis regulation
- Good shock and vibration resistance

249

228

ST-K BRACKETS FOR SAFETY LIGHT CURTAINS

Aluminum brackets for safety light curtains series SG

- Angular fixing brackets for side mounting
- Rotating brackets for top-bottom mounting
- Supports for orientation of angular brackets
- Antivibration supports for angular brackets

253

SLS- BRACKET COMPLETE BRACKET SYSTEM

SLS mount bracket

- Complete bracket system
- Pitch regulation bracket system
- Head protective bracket

259

CS-ME

FORCIBLY GUIDED
RELAY INTERFACE

CE UK CA cUL us

CS-ME is an interface with two forcibly guided relays, providing 3 NO contacts. The diagnostic function must be performed by the Safety Light Curtains through External Device Monitoring function.

- Pl e, SIL 3 Relay Interface
- 3 NO + 1 NC relays contacts
- Operating temperature: -25 ... +55°C
- Automatic restart

263

SE-SR2

SAFETY UNIT WITH 3
NO AND 1 NC RELAY
OUTPUTS

CE UK CA cUL us

Safety unit SE-SR2 can be used in combination with all Safety Light Curtains. It can be configured to work in automatic or manual restart, and can monitor external devices.

- Pl e, SIL 3 Safety Unit
- 3 NO + 1 NC relays contacts
- Operating temperature: -10 ... +55°C
- Auto/Manual restart, EDM

267

229

Laser Pointers

LASER POINTERS FOR SAFETY LIGHT CURTAINS ALIGNMENT

CE UK CA

Class 2 red laser pointer to be used to help the mechanical alignment of TX and RX unit of safety light curtain

- SH-LP: with fast plastic clamping bracket, compatible with SH4, SG2, SG4, SG4 EXTENDED, SG COMPACT BODY
- SG-LP: with regulable metal bracket compatible with SG2, SG4, SG4 EXTENDED, SG COMPACT BODY, SG BODY BIG, SG REFLECTOR

269

230

TP

TEST PIECES FOR SAFETY LIGHT CURTAINS

CE UK CA

Black metal cylindrical test rod to test the detection capability of safety light curtains

- Diameters: 14, 20, 24, 30, 34, 35, 40 mm

273

SG-SRT

MUTING CONNECTION BOX FOR EXTERNAL MUTING SENSORS

CE UK CA cUL us

Interfaces for muting sensors and safety light curtains with redundant forcibly guided relays, restart and override commands and muting indication.

SG-SRT1 and SG-SRT2 are interfaces provided with redundant forcibly guided relays, supplying a ready operator interface to restart or override the Safety Light Curtain, and have muting indication.

•

275

SG/SH Integrated muting arms

MUTING ARMS FOR SG AND SH SAFETY LIGHT CURTAINS

CE UK CA

Muting arms with preinstalled and prewired muting sensors, to be used in combination with SG and SH4 safety light curtains with integrated muting function

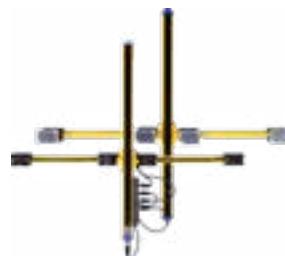

- Active/Passive models up to 3 m
- Emitter/Receiver models up to 7 m
- 4 parallel beams for bidirectional muting
- 2 parallel beams for monodirectional muting

277

SG-M

FLEXIBLE MUTING ARMS KITS FOR SAFETY LIGHT CURTAINS

CE UK CA cUL us

Modular, ready-to-use muting sensor kit for flexible installation.

- Pre-assembled arms with sensors mounted on adjustable brackets
- Kits for T muting (4 beams) or L and X muting (2 beams)
- Retroreflective sensors S100 or S8 with intensity regulation
- Cables protected inside the metallic arms
- Fast connection to the light curtain through SG-M-CB connection box

- Palletizers / Depalletizers
- Conveyor lines

281

LMS

MUTING LAMPS

CE UK CA

Depending on the risk assessment, an indicator showing when the muting function of a safety light curtain is active can be necessary.

- Yellow indicator with incandescent 24 V incandescence lamp
- Accessories for horizontal or vertical mounting

287

231

SG-PSB & PSM

**STANDS FOR SAFETY
LIGHT CURTAINS AND
ADJUSTABLE MIRRORS**

**CE UK
CA**

Robust protective stands for SG and SH4 safety light curtains and SG-DM mirrors. Version with pre-installed adjustable mirrors for perimetral protection using 2, 3, 4 beams light curtains.

- Heights from 600 to 1900 mm (stands)
- Heights of 500, 800, 900 and 1200 mm (with 2/3/4 adjustable mirrors)
- Optional plate with springs

289

SG-DM

**DEVIATING MIRRORS
FOR SAFETY LIGHT
CURTAINS**

**CE UK
CA**

Mirrors for safety light curtains with finger/hand resolution.

They can be installed in protective stands SG-PSB or floor columns SE-S.

- Heights from 600 to 1900 mm
- Mirror for single beam 150 mm high

293

SE-S

**FLOOR SUPPORTS
FOR SAFETY LIGHT
CURTAINS**

**CE UK
CA**

The floor supports SE-S can be used to install safety light curtains of series SG and SH4, or mirrors SG-DM.

- Available heights: 800, 1000, 1200, 1500, 1800 mm

297

SG-IP69K

PLASTIC IP69K
PROTECTION TUBES
FOR SG SAFETY LIGHT
CURTAINS

CE UK CA

PMMA acrylic tubes used to protect and seal safety light curtains of series SG2 BASE; SG2 EXTENDED, SG4, SG4 BODY COMPACT.

- Heights from 150 to 1800 mm (finger/hand)
- Heights of 500, 800, 900 and 1200 mm (body)
- Compatible with SG2 BASE; SG2 EXTENDED, SG4, SG4 BODY COMPACT

299

SH4 PLUGS

CE UK CA

Spare parts can be ordered in substitution of the parts included in SH4 family safety light curtains.

301

SH

SH4 REFLECTIVE
TARGET FOR LED
INTEGRATED POINTER

CE UK CA

Retroreflective target for SH4 Body Advanced Alignment

305

SLS-MG

CE UK CA cUL us TÜV SÜD

SLS memory group spare part for configuration and firmware backup suitable for SLS fast replacement in field.

307

SLS WINDOW REPLACEMENT WINDOW

SG-M

INTEGRATED MUTING ARMS

A FLEXIBLE SOLUTION FOR MUTING

SG-M

In some access guarding applications, like in palletizing/depalletizing machines, safety light curtains are muted while a load passes through their monitored area. When the load has an irregular shape, or has holes in it, muting can end before the load has completely passed the light curtain, causing the unnecessary stop of the machine. In cases like this, the ability to regulate the position and orientation the position and orientation of muting beams with increased flexibility, allows the system to adapt quickly and easily to any kind of situation. To simplify the installation of muting sensors in these kind of applications, Datalogic has developed the new SG-M muting sensors modular Kits. The SG-M includes retroreflective photocells as muting sensors, reflectors, cylindrical metallic arms, orientable plastic brackets, cables with M12 connectors, and a connection box for the quick wiring of the sensor outputs to the safety light curtain dedicated muting connector. The SG-M is the newest addition to a safety portfolio that includes integrated muting arms (SG-T-ARM and SG-L-ARM). The arms with external sensors can be attached directly to the light curtains of SG Series (fig. 1) or to their protective stands SG PSB (fig. 2). With SG-M, three standard configurations for muting beams can be easily installed: T Muting (fig.3), L Muting (fig. 4 and 5) and X Muting (fig. 6).

Sensors provided with the kit are retroreflective, dark on photocells, and come in two versions:
 S100-PR-5-B10-PK, for standard applications with no specific requirements
 S8-PR-5-B01-PP for applications where beam intensity regulation is required.

On the opposite side of the sensors, an reflector is mounted. Sensors and reflectors can be positioned along the arms and orientated both horizontally and vertically thanks to their brackets shape. Sensors have detachable cables (in T and L muting kits) or pigtailed. Both cables have an M12 connector M12 connector, for a quick connection to the safety light curtains through a dedicated connection box (SG-M-CB), or to an external safety controller through normal cables. The cables are protected inside the metallic arms and have different lengths (700 and 2000 mm), for easy installation on the light curtains, or on the protective stands.

The upstanding table shows the characteristics, the sensors and the cables included in any SG-M muting configuration kit in addition to the mechanical parts (arms and brackets) necessary to connect them to the profiles of the SG family safety light curtains.

(1) "Left side" and "Right side", related to L muting kits, refers to the position of the arm looking towards the receiver of the light curtain.

(2) Left side" and "Right side" kits differ only mechanically, in order to keep the regulating screws upside.

(2) In X Muting Kits, special versions of photocells with pigtailed and M12 connectors have been used.

(3) Cables used in T and L muting kits have M8 connectors on the sensors side, and M12 connectors at the external side.

(4) Minimum distance of 0.2 m is determined by the light curtain. Maximum distance of 3 m is to avoid interferences between muting sensors

Compatibility:

SG BODY COMPACT MUTING

SG BODY BIG MUTING

SG BODY REFLECTOR MUTING

SG2 MUTING

SG4 EXTENDED

SG-PSB (only models with 2000 mm cables (SG-M*-***-200-*))

LMS

MUTING LAMPS

Depending on the risk assessment, an indicator showing when the muting function of a safety light curtain is active can be necessary.

- Yellow indicator with incandescent 24 V incandescence lamp
- Accessories for horizontal or vertical mounting

STANDS FOR SAFETY LIGHT CURTAINS AND ADJUSTABLE MIRRORS

Robust protective stands for SG and SH4 safety light curtains and SG-DM mirrors. Version with pre-installed adjustable mirrors for perimetral protection using 2, 3, 4 beams light curtains.

- Heights from 600 to 1900 mm (stands)
- Heights of 500, 800, 900 and 1200 mm (with 2/3/4 adjustable mirrors)
- Optional plate with springs

AVAILABLE MODELS

| Description | Model |

APPENDIX

1. Performance level (pl) and required performance level (plr)

Performance level is one of five discrete levels (a, b, c, d, e) that specify the ability of the safety-related part of a control system to perform a specific safety function. The performance level depends on the system design, the reliability of components used, the diagnostic coverage of dangerous faults , and on the ability of the safety parts to avoid common cause and systematic faults. The minimum required Performance Level (PLr) to reduce a risk is determined by following the diagram in fig. 1, which takes into account three factors: the severity of injury, the frequency of exposure to hazard, and the possibility to avoid the hazard. Performance level and its calculation methods are described in EN ISO 13849-1.

Fig. 1 Required Performance Level

Risk parameters

S: severity of injury

S1: slight (normally reversible injury)

S2: serious (normally irreversible injury or death)

F: frequency and/or exposure to hazard

F1: seldom-to-less-often and/or exposure time is short

F2: frequent-to-continuous and/or exposure time is long

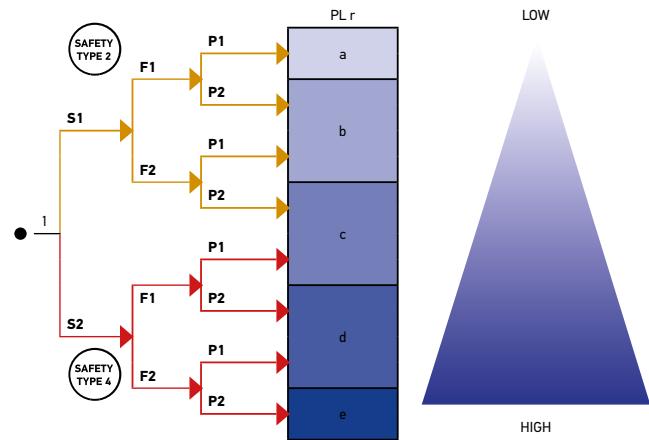

P: possibility of avoiding hazard or limiting harm

P1: possible under specific conditions

P2: scarcely possible

2. Type

Safety sensors whose function is to detect the interruption of beams by an object are called Active Optoelectronic Protective Devices (AOPD). AOPDs are classified in two Types (Type 2 and Type 4) depending on their design and optical performance. The optical performance is dependent on the maximum limit of the effective aperture angle (EAA), that is $-/+5^\circ$ for Type 2, and $-/+2.5^\circ$ for Type 4. A lower EAA results in a more focused beam. Type and Performance Level are directly correlated. The maximum PL that can be reached for a safety function that includes the use of a Type 2 AOPD is PL c, while for a Type 4 AOPD, the maximum is PL e. Based on these considerations, to reduce the highest risks on machines, Type 4 AOPDs should be used (see Fig. 2). Active optoelectronic protective devices and corresponding Types are described in IEC 61496-1 and IEC 61496-2

Key

1 starting point for evaluation of safety function's contribution to risk reduction

L low contribution to risk reduction

H high contribution to risk reduction

PLr required performance level

Risk parameters

S severity of injury

S1 slight (normally reversible injury)

S2 serious (normally irreversible injury or death)

F frequency and/or exposure to hazard

F1 seldom-to-less-often and/or exposure time is short

F2 frequent-to-continuous and/or exposure time is long

P possibility of avoiding hazard or limiting harm

P1 possible under specific conditions

P2 scarcely possible

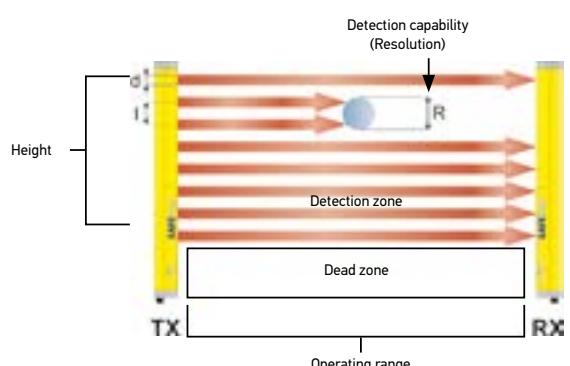

3. Detection Capability (or Resolution)

The detection capability of a light curtain is the diameter of the smaller object that will activate the device when it's placed in any point of the detection zone. The value of the detection capability, together with response time, is crucial to calculating the minimum safety distance required between the light curtain and the dangerous zone.

For single light beam sensors and for multiple light beams sensors (2, 3 or 4 beams), in place of detection capability, it's common to use the number of light beams. In this case, their purpose is to provide "body protection", detecting the passage of the entire body of a person.

For an introduction to the minimum safety distance calculation rules (described in EN 13855) see page 94 and the light curtain's technical documentation.

Fig. 2 Required Performance Level

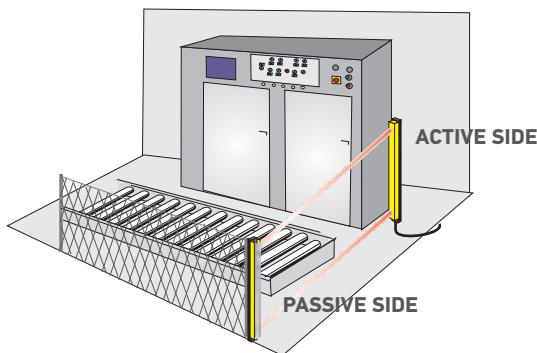

If the light curtain is retroreflective, the operating range is the distance between the active and the passive element.

Light curtains can have a “dead zone”, in which they are not able to detect the object due to the absence of beams. When it is required that the dimension of the light curtain corresponds exactly to the height of its detection zone, the light curtain is said to have zero dead zone.

5. Retroreflective light curtains

2, 3 and 4 beams light curtains can be manufactured with all emitters and receivers on one side, and passive elements (mirrors) on the other side. The advantage of using a retroreflective light curtain is that only one side needs to be powered on.

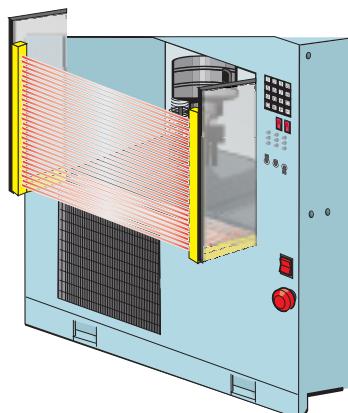

Fig. 4 Retroreflective Light Curtain

6. Cascading

Cascading is when two or more light curtains are connected to each other, resulting in one system that functions as a single light curtain.

Advantages of cascading are: better monitoring of dangerous areas with presence detection beyond the vertical detection zone and space and cost savings by using a single safety unit.

7. Response time

The response time is the maximum time occurring between the detection of the test object in the detection zone and the activation of the light curtain's outputs. It is a safety relevant parameter, and its value must be taken in account when calculating the position in which the safety sensor will be placed in relation to the dangerous area.

8. Manual or automatic restart

Depending on the initial risk analysis of the machine, a start or restart interlock can be a safety requirement of the control system. It prevents an automatic restart of the machine during a dangerous part of the operating cycle after activation of the sensing device, or when the electrical supply of the sensor is switched on or restored after interruption.

This interlock can be implemented by a manual restart of the safety controller or by the light curtain itself.

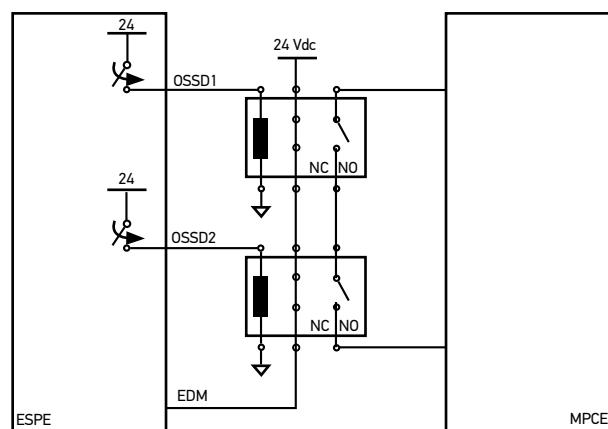

9. External Device Monitoring (EDM)

EDM is a function that allows the electro-sensitive protective equipment (ESPE) to monitor the state of control devices (i.e. contactors, actuators) that are driven by its outputs.

This function can be achieved by the safety controller or directly by the light curtain.

Fig. 6 External Device Monitoring wiring diagram

10. Muting

Muting is the temporary automatic suspension of a safety function. When a light curtain is muted, its outputs will remain ON even if an object is detected in the detection zone.

Because muting suspends a safety function, it must be implemented with all necessary precautions and in compliance with the machine-specific safety requirements.

T muting is a specific kind of muting that can be used to allow the passage of material through an opening in direction of the dangerous area or in both directions. L muting can be used only if material exits the dangerous area.

Fig. 7 Safety Light Curtain with Integrated L muting actuator

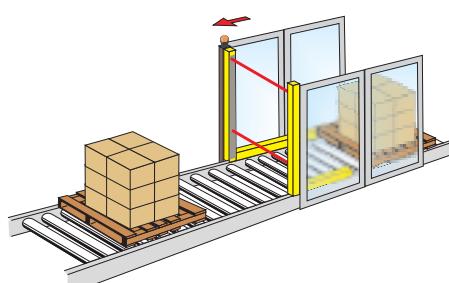

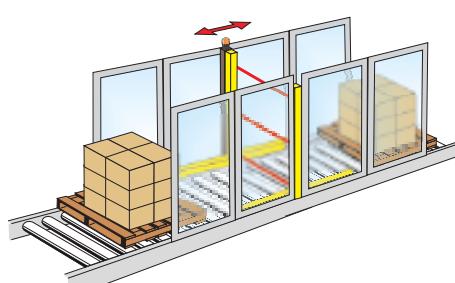

Fig. 8 Safety Light Curtain with Integrated T muting actuator

Light curtains can be provided with muting arms, with pre-wired sensors detecting the passage of material, or can be used with external muting sensors.

Fig. 9 Safety light curtain with external crossed beams muting sensors

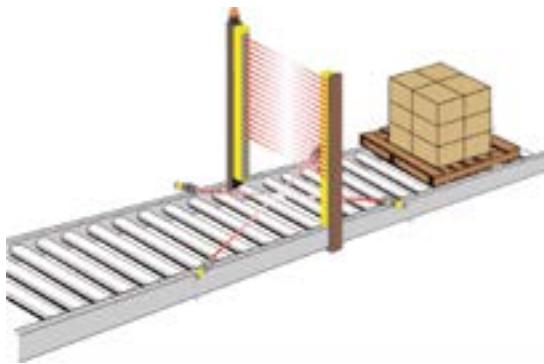

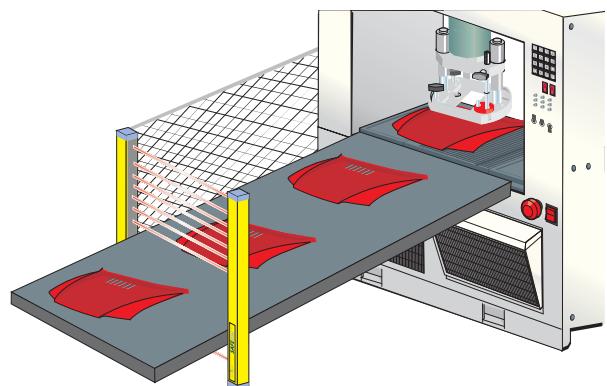

Fig. 12 Fixed blanking with tolerance

Muting lamps integrated in the light curtains, or installed external to them, are designed to flash as long as the muting is active.

Fig. 10 Integrated muting lamps

To maintain the safety of the application, light curtains can be configured to perform the muting function only on the number of beams needed for the passage of the material (Partial Muting), keeping the others active.

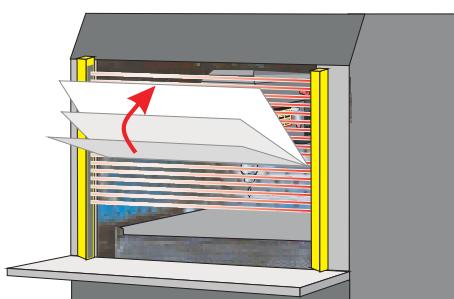

11. Override

Override function is a mute dependent bypass of the light curtain, that can be provided for some applications (for example conveyor and packaging machinery) in order to clear a blockage in the area of the machine where sensors are located. The activation of the bypass function should be possible for a limited amount of time, only when at least one muting sensor is activated, and will require the use of a device located where operator can see the point of hazard.

12. Blanking.

The blanking function is used when an object detected in a defined part of the detection zone must not cause an OFF-state of the light curtains outputs. Blanked beams are monitored so that the absence or a change in the size or location of the object causes the light curtain's outputs to go to the OFF-state. Fixed blanking is when the object must remain in a fixed position, with a given tolerance. Floating blanking is when the object can move along the detection zone. Depending on the configuration of the light curtain, in floating blanking the object can also leave the detection zone or not. Reduced resolution is a particular kind of floating blanking, with light curtain outputs going OFF-state only when a pre-defined number of beams adjacent are interrupted, in any position along the light curtain. When reduced resolution is active, more than one small object can interrupt the light curtain beams without its output going OFF.
